

DISTINCTIVE STREETSCAPE FURNITURE

UrbanStone was founded on the principle that “creating a complete landscaping concept should not only improve our environment but also enhance our lifestyles and urban streetscapes.”

In realising this objective, distinctive items of UrbanStone street furniture have flowed into our urban developments, complementing the exciting UrbanStone in-situ paving designs.

The durability and maintenance-free finishes of the streetscape accessories provide excellent performance in areas of high traffic and wear, such as malls, transport stations and on sidewalks.

The use of contrasting colours or finishes in the streetscape will only add to the sensational designs and furniture accessories available.

Enhancement of our environment is so easy with UrbanStone’s natural aggregate range of paving and furniture accessories.
