

The logo for UrbanStone, featuring the word "URBANSTONE" in a bold, white, sans-serif font with a small trademark symbol, set against a black rectangular background with a thin white border.

URBANSTONE™

A large photograph showing a modern building with a red and tan facade. A paved walkway with a decorative brick border leads to a circular garden bed filled with colorful flowers. A black metal railing is installed around the garden. A young tree with light-colored blossoms stands in the garden. A black street lamp is visible on the right.

**URBANSTONE ENSURES A
STYLISH ELLENBROOK LANDSCAPE**

A new standard in creative landscaping.

CLIENT'S PERSPECTIVE

The design of stylish Ellenbrook Estate has brought integrated landscape design to new heights with the first use of Urbanstone's high quality honed finish pavers in a Western Australian real estate subdivision. All sidewalks around the first planned village centre in the development have been completed using the richly coloured Topaz pavers with a honed finish, giving the closest look to polished granite and marble, without the dangerous slippery surface.

The Landscape Architect, Peter Cala, from Peter Cala & Associates, said Urbanstone had been chosen for the Ellenbrook subdivision to provide a hard wearing paving product with a top quality finish.

"One of the central reasons for choosing Urbanstone was that, for this project, it achieves a better overall texture statement than concrete or clay

pavers because of the larger module size of the product", Mr Cala stated.

The pavers are made from natural crushed stone and mixed with

Mr Cala commented that durability is important in areas with high volume pedestrian traffic and Urbanstone offers a quality finish that fills the demanding requirements of highly urbanised situations perfectly.

After having successfully completed projects such as Double Bay in Sydney and Joondalup in Perth, Urbanstone is recognised as a leader in the commercial paving field.

Urbanstone provides a fully integrated landscaping system. This includes paving, street furniture and a wide range of feature products which are all meticulously crafted to capture the unique and timeless appeal of natural stone.
