

URBANSTONE™

**URBANSTONE BRINGS FREMANTLE'S
CAFÉ STRIP TO LIFE**

A new standard in creative landscaping.

CLIENT'S PERSPECTIVE

The distinctive look of Urbanstone paving is adding new life to the popular South Terrace cafe strip in Fremantle, in a refurbishment of the inner city pathways by the Fremantle City Council.

The high profile South Terrace cafe strip is being paved using Urbanstone's popular reconstituted stone paving featured in Gunmetal with a shot blasted finish.

The decision to use Urbanstone's distinctive pavers was the result of an extensive study on the current paving requirements for the City and according to the Manager of the Physical Services Department, Geoff Webster, Urbanstone offered the distinctive character the council was looking for.

"Urbanstone has a number of features we consider important when paving a food area with a high level of pedestrian traffic", Mr Webster said.

"We needed a product which not only has an excellent appearance but is also easier to maintain, despite the food and drink spills which will

as the surrounding port, shopping and residential areas".

Mr Webster added that the evaluation of available products in the landscaping paver market revealed that Urbanstone was the most attractive product and was competitively priced - a conclusion that is endorsed by a growing list of successful projects including Southbank in Melbourne and The East Perth Redevelopment in Perth.

Urbanstone provides a fully integrated landscaping system. This includes paving, street furniture and a wide range of feature products, that have all been meticulously crafted to capture the unique and timeless appeal of natural stone.
